To: Work <stevengvillewater@yahoo.com>, "gregsredden@gmail.com" <gregsredden@gmail.com>

I contacted Dell and requested a quote from them reflecting the increase in memory you requested. They offer computers with 4Gb or 8Gb packages, so I had them quote an 8Gb version.

Dell Inspiron 3647

\$504.00

Intel Core i3-4160 Processor (3.60 Ghz)

8 GB DDR3 Memory

1 TB Hard Drive

Windows 7 Professional x64 (includes Windows 8.1 Pro x64 License and Media)

They also offer a 4 Year Next Business Day Onsite warranty for an additional \$110.70 per computer (total price would then be \$614.70).

Please contact me if you have any questions, or need any additional information.

Computer Recommendations

I spoke to Keystone Software and asked for their recommendations regarding hardware and whether the software should store the database on a separate computer. They indicated that both computers I have recommended below would be more than adequate. They also recommended that the database be stored on a separate computer dedicated to that purpose.

I have listed two options. Both are pre-loaded with Windows 7 Professional operating system, and include the media and licensing to upgrade to Windows 8.1 Professional. The first option completely fulfills the specifications provided by Keystone Software. The second option includes a more powerful processor, and more memory. While the first option can have its memory upgraded at a later time relatively easily; upgrading its processor would be a much more complicated and expensive option. Neither computer includes monitors, but 19-inch monitors can be purchased for about \$110.00 each.

Option 1

Dell Inspiron 3647

\$399.00

Intel Core i3-4160 Processor (3.60 Ghz)
4 GB DDR3 Memory
1 TB Hard Drive
Windows 7 Professional x64 (includes Windows 8.1 Pro x64 License and Media)

Option 2

Dell Inspiron 3647

\$599.00

Intel Core i5-4460S Processor (3.40 Ghz)
8 GB DDR3 Memory
1 TB Hard Drive
Windows 7 Professional x64 (includes Windows 8.1 Pro x64 License and Media)

I have recommended Dell computers for three reasons. First, in my experience, Dell computers are the easiest to repair and upgrade. Second, Dell provides an operating system disk to allow the

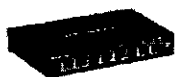

Falls Cities

TECHNOLOGY LLC

computers to be rebuilt with a clean version of the O/S. Most vendors provide discs to allow the computer to be reset to their factory default settings, but this also includes re-installing any unwanted software the computer originally comes with (e.g. – eBay links, games, adware). Finally, if warranty work is ever necessary, parts, or technicians are sent to the location to make the repair. Many other vendors require the computer to be sent off site for upwards to a week. In my experience Toshiba and Sony are particularly bad in this respect. Dell and HP are both very good.

I've also recommended the Professional versions of the operating system. While it is not necessary, if a Windows Server is ever installed, it will save a significant amount of time and money.

Additional Hardware

NETGEAR ProSafe GS108

\$45.00

8-Port Gigabit Switch

I would recommend replacing the current switch with a gigabit switch. Gigabit refers to the speed of the switch, and is 10x faster than your current switch.

Additional Software

If additional operating system upgrades are required for older computers copies of Windows 7 Pro / Windows 8 Pro can be purchased for about \$135.00. However, if the Water Utility is a non-profit, and qualifies, software can be purchased through www.techsoup.org. For example, Windows 8.1 Pro can be purchased for \$8.00, and Office Professional Plus 2013 can be purchased for \$32.00. These are substantial discounts and worth exploring. TechSoup also provides discounted software from numerous other vendors.

Falls Cities

TECHNOLOGY LLC

Quote

4 x Option 1	\$1596.00
4 x Option 2	\$2396.00
1 x Gigabit Switch	\$55.00

Require Time to install computers and Switch*

12 Hours @ \$80.00/hr	\$960.00
-----------------------	----------

Total Option 1	\$2611.00
Total Option 2	\$3411.00

*I have estimated the amount of time necessary as 12 hours, however, the final bill will only be for the actual amount of time needed.

The price of the computers might change by small amounts, and do not include shipping and sales tax, however, shipping is usually free.
